## **Sauereisen Welcomes Materials Scientist Kyle de Bruyn**

Pittsburgh, February 16, 2010 – Sauereisen Inc. recently hired Kyle de Bruyn for the position of Materials Scientist. He will be working in the research, development and testing of Sauereisen’s inorganic product line including refractories, mortars, underlayments, cement-based linings, and ceramic adhesives.

“Kyle’s expertise and previous experience in our industry made him an ideal choice for the position,” said Gary Hall, Sauereisen’s director of research operations. “In this role, Kyle will conduct research on new technologies, formulate product enhancements, and serve as a valuable technical resource for contractors on issues related to product application and curing properties.”

Mr. de Bruyn holds both an undergraduate and master’s degree from the University of California, Los Angeles in Materials Science and Engineering. Before relocating from Los Angeles and joining the Sauereisen team, he worked for CTS Cement Manufacturing (Cypress, CA) for seven years formulating specialty cement products.

Established in 1899, Sauereisen is a third-generation manufacturer that provides worldwide product distribution of corrosion-resistant materials. The company is dedicated to establishing expertise in the prevention of corrosion and the restoration of structures affected by it. Sauereisen coatings and linings are commonly specified within the aggressive environments of the wastewater, power, food processing and chemical industries. For more information about Sauereisen, visit [www.sauereisen.com](http://www.sauereisen.com).
